ARSENIC LEVEL REPORTING (PAGE 12):

The purpose of this submittal is to correct an error in the original submittal of the subject Annual Report. The level of arsenic in the water system given the well in operation at the time of the sample was 0.002 mg/l, which is well below the federal and state drinking water standard of 0.010 mg/l for this contaminant. A copy of the test result showing this level of arsenic is appended hereto.

Additionally, the company has submitted two additional arsenic samples within the past week to reflect to provide further confirmation of the arsenic levels in the in system, and these will be forwarded to the commission upon receipt.

If you have any questions regarding this matter please feel free to contact Richard S. Williamson, P.E. at the above phone number. Thank you.

Respectfully submitted,

Richard S. Williamson, P.E.
